DHIO STATE TELEPHONE CO.

Succeeds the Youngstown Telephone Co, and Great Improvements Are Under Way.

The Youngstown Telephone Com-pany, the "new" or "independent" company, was rganized in 1896. It was formed by local business men to supply a more complete and satisfactelephone service at a lower rate than was at that time available. The board of directors included Samuel Weil, M. T. James, Mason Evans, Anthony Howells, E. J. Evans, all local

the second floor of the building at No. West Federal street. The switchboard was of the magneto type, with a capacity of 600 lines.

The almost immediate increase in business demanded larger quarters. In 1900 the entire second floor of the three-story Dollar Savings & Trust company's building on the Public Square, was leased for exchange pur-In fact, the present Dollar Bank building was constructed without removing the telephone exchange from that location, where it has since remained.

A common battery switchboard of 2,000 lines capacity of the best type to be obtained, was installed; this also necessitating the installation of new telephones for all subscribers. At this

calls may be made in this way, and when the new syctem is in operation here it will be possible to call Akron without first getting the long distance operator. Akron can now talk to Co-lumbus, and in Texas the subscribers n Houston can, from their own homes, call friends in Dallas 300 miles away.

ill be possible only through the medium of a long distance operator as at present. Companies, too, which have operators in their buildings will continue to have them, since the traffic cannot be distributed automatically when callers do not know just which lepartment they want. But the auto matic system does have a device by which, when a subscriber has three or four trunk lines and a dozen or so tel ophones in the building a call that mes over a busy line is automatical ly switched to one that is free.

tem is that it has few open or exposed wires. Much danger and interference to the service from lightning, wind, and snowstorms are thus avoided. There are numerous devices, also, which anticipate trouble, instead of

Eight months more will be required to complete the work in which the Ohlo State Telephone company is engaged here. The actual operation of the new system will be awaited with interest as it will be entirely new to time also an extensive underground most people in Youngstown and vi-cable system, the first of any kind in cinity.—Vindicator.

MANAGER GEORGE G. KING

Youngstown, was constructed. Also great extensions were made to aerial cable and wire systems, making in all as complete and perfect system of communication as was then possible.

Additions and extensions have since been made at frequent intervals, but owing to the unprecedented growth of the city, and also on account of the great improvement in strictly upto-date telephone apparatus, it has been decided to treble the present underground cable system, add 100 miles of cable, build a new exchange building and install the automatic tele-

Among those connected with the Youngstown Telephone company who have achieved prominence are C. Y. McVey, manager of the Ohio State Telephone company, at Cleveland, who was last week at Chicago elected president of the National Independent Telephone association; G. X. Cannon, telephone expert for the Ohio public utilities commission, who was local su-

perintendent for a number of years. The managers of the Youngstown Telephone company have been: A. Morgan, now of Kansas City, Mo., 1895-99; B. H. Evans, now of Cleveland, 1899-1900; C. Y. McVey, now of Cleveland, 1900-04; William Crosley, now general superintendent of a tracpower and light company in a city in the middle west, 1904-05. The present manager is G. G. King, who has been with the company since its organization, and manager since August 1, 1905. Henry Cook is superin-

The Youngstown Telephone com pany was taken over by the Federal relephone company in 1900; by the United States Telephone company in 1903, and by the Ohio State Telephone company in July, 1914.

Changes in Progress Here. The changes which the Ohio State Telephone Co. is now making in Youngstown will cost about half a million dollars. They include the laying of twenty miles of underground cable and the stringing of eighty miles of aerial cable, all within the city lim-The actual wire mileage within the city, which will all be new, will be about 5,000 miles. The automatic system will take the place of the board now operated by girls. The company is considering several building sites and will proceed shortly to erect an office building which its officials say will be an ornament to the

The work here in in charge of en-gineer Frank H. Hale. Just before coming here, Mr. Hale changed the telephone system of Jacksonville, Fla. and Havana, Cuba, from the manual to the automatic systems.

The automatic system, said Mr. Hale last week, has been adopted by the British postoffice department, which regulates the telephone business of the British Isles. It is in general use throughout Canada. Los Angeles has the automatic system with 60,000 telephones; the Chicago company em-ploys it with 40,000. In the west and south the automatic system has been adopted also by Spokane, Portland, Dallas and Houston, Texas, and Tampa, Fla., Dayton, Columbus, and Akron have it in Ohio. Buffalo has just installed it, Minneapolis and St. Paul are together installing a system for 15,000 lines, and Key West is about to put in the new system. Australia is changing over to the auto-matic, and it is rapidly winning favor

in South America. Advantages Claimed for the New Way The automatic system, said Hale, has now been in practical use for 15 or 16 years, and is gradually winning its way as its advantages be come apparent. In the first place it effects a great saving in cost of oper Though much more expensive to install, it does not require the ser-vices of girl operators, whose wages nave increased in the last few years from \$18 to \$39 a month. It insures absolute privacy. The subscriber himself, by means of a small disc, calls the number he wants. It takes about seven seconds to make a connection: seven seconds to make a connection; the bell then keeps ringing until the party calling hangs up his receiver, or, if the line is busy the fact is made known by a buzzing in the receiver. As soon as one call as finished another may be made immediately, without having to wait to attract controls attention again. Many four distance

Eight Months More of Work. Many long distance calls, of course,

ISLAND

Feb. 25-Oliver Blosser will soon leave for Wayne county where he has been employed to work on a farm. S. W. Yoder of Locust Grove was here Friday dehorning cattle. Floyd Wilt has hired to Lyman Schnurrenberger and will begin work the first of March.

S. D. Culp is sawing lumber for Henry Lehman's new house. Noah Bixler will do the concrete work, C. M. Calvin the carpenter work, Chas. Hemrick and John Culp the brick work, J. E. Gilbert the slate roofing and Steve McClun will do the paintig. The plastering hasn't been let. Abram Weaver and wife visited J.

M. Knopp and family Thursday. Jacob Culp has bought the Mrs. Nathan Fuhrman property on North Main St., Columbiana, and will soon move there. Mr. and Mrs. Jacob Lehman are the

happy parents of a brand new baby Francy Culp had special business in

Wayne county over Sunday. S. G. McClun and family and Grandma Burns spent Sunday at Alvin Detrow's.

Fred Bruderly, Mr. and Mrs. S. R. Martin, Mrs. Henry Lehman, Paul Calvin, Mrs. Adam Wenger and Mrs. . M. Knopp, who were on the sick list, are able to be up and about. Chas, Lantz of Maryland will work for J. M. Knopp next summer. S. G. McClun butchered for Harvey

Good Monday and for D. R. Lehman Wednesday. Jonas Knopp left Sunday for Blue Ball, Lancaster county, Pa., to see his son Ezra who was taken sick with typhold-pneumonia while visiting there

with friends. Miss Mollie Lehman spent Saturday and Sunday with her cousin, Miss Alta Lehman, who had an operation performed on her leg, having removed a portion of decayed bone some seven months ago and is not able to use her limb yet but goes about very cheerfully in her wheel chair. She is longing for warm weather so as to move around out doors.

Miss Elsie Miller, who is taking a course in the North Manchester, Ind. college, informed her parents that twelve students in the institution had been stricken with smallpox.

A. W. Detrow had business in North Lima Wednesday. Earl Brubaker and Oliver Blosser, with their lady friends, visited J. D.

Blosser and family over Sunday. Alex Wilson moved Tuesday from the John Yoder farm to the Henry Sponseller farm and Wm. Compton took possession of the Yoder farm the same day. Nick Stempfli unloaded a car of glut-

en feed Thursday and Albert Harrold unloaded a car of dairy feed Monday. Wm. Eshelman of Orville is visiting friends here and calling on his brother John who is teaching school in North Lima.

John Horst and family called on Mrs. Frank Rohrer in Columbiana Sunday. Mrs. Rohrer is laid up with

Mrs. John Riehl, who underwent an operation in the Youngstown City hospital Monday, is getting along nicely. Lyman and Ira Schnurrenberger will Mr. and Mrs. Samuel Good were entertained Sunday by Jonas Wisler and

vinter cholera.

Mrs, Frank Rohrer. Dr. Buckwalter's stork left a baby girl at the home of Mr. and Mrs. tion is approved it will be circulated Jonas Horst last week. H. E. Calvin is doing carpenter

work for H. H. Calvin. Mrs. Mable Rhodes of Dayton, Va., is her visting her brother, Harry Sho-

walter. The spelling contest held at the No-8 Oakdale school house Tuesday evening proved a success, about 135 people being present and listened to a literary program given by the home school which was well rendered under the direction of the teacher, Miss Marie Welkart, and after recess O. S. Walter a member of the Green township school board and a school teacher in earlier years, gave an interest-ing address on old-time spelling bees, after which he took charge of the contest in pronouncing to a large class of pupils, some of whom took part in this kind of contest forty years ago. The first prize, \$1, for the school won by Miss Ida Weaver. The sec ond prize, 50c, went to Joseph Wenger and the champion prize, \$1, that was open to the public was carried off by

Miss May Wisler. Homer Heintzelman, who had his injured arm treated in the Salem hospital, returned home Wednesday.

Henry Lehman is ill with grip Homer Heintzelman will have a sale March 11 and Kennedy brothers will have theirs March 17. Mrs. Ella Detrow and Mrs. Cassie Martin called on Mrs. Jacob Lehman Wednesday.

Ezra Knopp, who is sick at Lancas ter, Pa., is reported to be improving Newt. Heatwole and w'fe of Virginia are visiting here.

H. E. Grosshans

Attorney H. E. Grosshans of East Liverpool has formed a partnership with attorney L. M. Keyes of East Palestine, which makes a strong team. Years ago Mr. Grooshans attended the N. E. O. N. C. in Canfield and in 1894 graduated with honors from the Cin-cinnati Law School. He had since enjoyed a lucrative practice in East Liverpool. That "Holly" may do even better in the city of scriptural name is the wish of a lot of old Canfield friends.

Maybe you also have noticed that to kind of man who is stingy and

END WORK MARCH 5

Another Lawmaker Offers Resolution for Early Adjournment of Assembly.

ST D. M. BONGWAIL Columbus, Feb. 24.-Pressure on the part of those who want the general assembly to adjourn sine die and go home is becoming pronounced, but the assembly seems intent upon taking its own time. The adjournment resolution of Senator Pink of Hamilton county, who believes that the session could he ended on March 19, the senate has consigned to the finance committee just to show that it didn't take the suggestion seriously. Now comes a house member to suggest adjournment on March 5, and, of course, this won't be considered in any light except that of being funny. Meantime the house and senate are going ahead with a sort of serene complacency and in a manner jovially. Each house insists upon having all the fun possible out of life and seldom does either lose a chance to inject a bit of drollery into the proceedings. Take, for instance, the preliminaries incident to the house's action in killing the antielgaret bill. One member simply couldn't resist the temptation to suggest an amendment prohibiting the smoking of a briar pipe for more than 30 days, and the house laughed hysterically as the speaker held the suggested amendment wholly out of order. But, as one member of the majority averred, it doesn't always pay to be always serious, or, at least, the house is inclined to look at life in that way. But the senate did a bit of serious work when it voted to kill the Vollenweider bill, which proposed to

repeal the non-partisan judiciary law enacted in 1911. It took the upper branch just a few minutes to express its opinion of the attempted appeal and that opinion was voiced by an indefinite postponement, which amounts to a mild chloroforming. The attitude of the senate was especially interesting in view of the fact that the Vollenwelder measure sought to frame the line of demarcation between the so-called reactionaries and the socalled progressives. The latter have nsisted all along that the non-partisan judiciary law is a measure all their own, and that the effort to repeal it was a reactionary one. So, if this criterior is the correct one, then the senate must - be progressive. But,

after all, it resolves itself back into the question of viewpoints. Dry Petition Will Be Different The Anti-Saloon League within short time will file with Secretary of State Hildebrandt for approval a draft

of the petition to be circulated asking save a public sale Thursday, March 4. for another state-wide prohibition amendment next fall. The petition will differ from the one submitted last fall in that it will not forbid the importa-Miss Mary Weaver is suffering with tion of liquor for sale as a beverage. Miss Priscilla Lehman is assisting inhibition will be included in federal statutes. Immediately after the petiin all the counties of the state. It is proposed to obtain a larger number of names than were on last year's peti-

> tion. Must Give Full Measure.

The state agricultural commission as the right to specify the size and shape of measures for selling produce, so the Franklin county common pleas court holds in a decision just given. This means that hereafter it will be unlawful for dealers to use the tall, narrow measures instead of the wide. low measures prescribed by the commission. The use of the tall, narrow measure makes it possible for unscrupulous dealers to "stack" the contents and thus cheat the purchaser by not giving him full measure.

Worked on Many Newspapers. Frank B. Patrick, Xenia newspaper man just appointed deputy state insurance superintendent, has been em ployed on Columbus, Urbana, Springfield and Gary, Ind., daily papers. He was a member of the staff of the old Columbus Press, which suspended publication some years ago, early in the nineties. Patrick will get a salary of \$2,500. He was appointed by State Insurance Superintendent Frank Taggart, the appointment being the first to be made by the latter: Gov. Willis approved the appointment Tuesday.

Minority Leader's Contention. Ohio legislators draw a salary of \$8,000 a year. At least, that is what John Kramer, the minority floor leader in the house, says. He made his colleagues sit up and take notice when he twitted them upon their "economy" in attempting to cut the salaries of clerks in various departments and then drawing \$8,000 annually themselves. Kramer figures it this waythat the legislators draw \$2,000 for two years' work and work only three months of that period.

Dine on Alligator Tails. New York, Feb. 24.-Alligator talls, spiral eared polar mice, whale meat, boa constrictor and whale blubber were some of the delectable dishes served to 100 members and guests of the Canadian camp at the Astor.

"Berle", from which Berlin has caught her name, means uncultivated land. Slavonian Wends, the earliest settlers on the sandy plain, could make but little out of the soil. The population in 1832 was only a quarter of a million; less than forty years later it was 300,000, and now it runs into two millions. The man who gave to Berlin its present form was Fred erick II, but Frederick the Great and the Great Elector started the noble hobby of beautifying the wonderful city.

It has been shown in practice tha concrete buildings require less artifimill construction. This is owing to the reflection of light from the white walls and callings and columns and also to the fact that it is possible to supply buildings of this character with greater window area than YELLOW CORN MAKES STRONG COLOR IN EGGS

Carefully Conducted Experiments on Divided Flock Shows a Decided Effect

Experiments have been conducted show the effect of corn on the color of the yolks of eggs. A flock of 120 single-comb white Leghorns was divided into three lots of 40 each, and these were housed and cared for alike, except that one pen received its whole grain in the form of corn, another in the form of wheat. All pens were allowed free access to narrow yards, which furnished a very limited

amount of green stuff. All the eggs laid by these hens were saved, and after boiling were cut in half and placed in parallel rows for comparison. In every instance the eggs from the cornfed lot showed yolks with a deep yellow color. Every egg from the corn and wheat fed lot had a yolk of good yellow color, while with but three exceptions the eggs from those fed wheat had yolks of a very pale yellow color. The three exceptions can probably be accounted for by some of the hens getting green food from the yards. Another test was made subsequently with white corn, and the yolks were a very pale

yellow. As a result of the tests it was con cluded that yellow corn, when fed to hens in the proportion of nine parts of corn to twelve parts of mash, gives a very deep yellow color to the yolk. Yellow corn, when fed to hens in the proportion of four and one-half parts corn to sixteen and a half parts of other foods, gives a noticeably yellow tint. Wheat, when fed in the same proportions, does not give any vellow color to the eggs, and white corn is no better than wheat so far as furnishing a tint to the yolk is concerned.

Results of Crossing The effects of the extended use of mutton rams in fine-wool flocks, so common to in the last two years, are coming to the surface, and fine-wool men have had a better call for rams this year than in the two preceding breeding seasons. It is a safe guess that by another year the demand will be keen and the breeders who have stuck to their fine-wools will be rewarded for their faith in the breed and the efficiency of the fine-wools

as a farmer's sheep again asserted. Just recently a neighbor who last fall used a mutton ram sold his lambs because "they had stomach worms." He has bought and is now using a Delaine ram. His experience has been that of thousands of others. Reports from the West indicate that sheepmen are eager for fine-wool rams to regain in their stock ewes the Merino blood which is so essential in range sheep, but which has been bred out by too extensive use of mutton rams. Not the least doubt exists but that the use of a mutton ram on Merino ewes produces high-class market lambsprobably all things considered there is no lamb that on the average returns a better profit. But the danger in such breeding is very liable to offset the advantages. For the man who does not pay especial attention to his ewes the gradual increase of mutton blood in them by the use of mutton rams year after year is almost sure to end in a decrease in profits, and the result is an unsatisfactory ewe brand that is

The mutton ewe is a creature of entirely different habits and require ments than the fine-wool ewe. Under careful management the former will give the most excellent results, good weight of fleece may be retained and stomach worms avoided. Under ordinary care, average farm care, weight of fleece in mutton flocks will become too small to be satisfactory, and stom-

ach worms will work havoc. For the man who is producing market lambs the use of a mutton ram on Merino ewes for a year or two at a time may be good practice if he knows when to go back to ..ne-wool rams and will do it. Too many fail to make this move until it is too late, and they are liable to get disgusted and quit sheep. The safe way is to use big-bodied, rather smooth, well-wooled ram of Delaine type and breed toward a large deep-bodied fine-wool type of ewe that will shear well and raise good lambs. Rams of the sort to aid in this line of breeding are neither plenty nor cheap, but they must be found and will pay

If You Insist on Feeding Wet Mashes, Clean the Dishes

The stand of most successful poultrymen on the wet mash controversy is to feed it to folws for fattening purposes, but for layers the mash should be dry. It is also safest to avoid feeding wet mashes to chicks until they are past the danger stage of contracting bowel ills. In any case, where a wet mash is fed the birds should receive only as much as they will clean up. If any food remains in the dishes it should be removed. Wet food remaining accessbile to chickens after they have had enough is soon contaminsted and becomes an excellent spreader of disease.

Chickens as Lawnmowers

The backyard poultry flock will save lots of wasted energy used in pushing the lawnmower if they are permitted to range over the lawn for a couple of hours each evening. There is little danger of their getting into mischief if let out for a short time just before bedtime, for they will avail themselves of the opportunity to fill up on the tender grass blades, keeping the lawn uniformly clipped all the time, at the same time enriching the soil so evenly that the grass will not grow luxuriantly in spots, as it does when fertilizer is spread over it by hand.

If you do not grade your eggs, someone else will, and you will pay him for doing it.

Placing the Credit.

Luke wrote the following paragraph some years ago, and it appeared in his column. Since then it has been going the rounds credited to almost every publication in the country. Here it is: "One morning father missed some money out of his clothes and thought mother had frisked him during the night. So, while mother was busy in another room, father went through her

hand bag in search of his coin. He found a receipted milk bill, an unpaid ice bill, a big hunk of prepared chalk, a powder puff, two coupons six months old, representing the last time he had taken her to the theater; a button hook, six samples of dress goods, a clipping containing Gene Field's "Little Boy Blue," a sample of talcum powder, one of the baby's mittens, an old tintype of himself taken before marriage and 7 cents in coin. And father felt so mean that he kicked himself all

Things to Worry About. The average depth of the sand on the African deserts is from thirty to

Daily Health Hint. Never stand behind a mule when you are arguing with him.

Our Daily Special. Be a good loser, but don't make it a

Luke McLuke Says: You can make a woman madder by ignoring her than you can by calling

her names. When a girl marries she usually loses a good friend and gets a grouchy boarder. Politics is one of our most popular

sports because you can talk it all day and not know a blame thing about it. When they are engaged they imagine that they can get along with one chair when they go to housekeeping. But after they have been mar ried for awhile they want two differ-

ent parlor suits. The lad who loafs around and owes everybody in town is the same fellow who is deeply worried because the

Panama canal isn't paying expenses. The old fashioned poker player who used to walk around his chair to change his luck now has a son who can deal a diamond from the bottom

when his stack gets low. Before he gets her he thinks she is a humming bird. After he gets her be discovers that she is a screech owl. Conscience may help some. But the fear of getting caught is what keeps most of us straight.

A woman may have no aim in life. But she always seems to hit the target when she starts out to shoot Friend Husband.

There isn't any fun in fishing if you have to catch fish for a living. Before she gets him she believes all he tells her about his prowess as an athlete. After she gets him she discovers that about the only sport he ex-

cels in is throwing the bull. Once in awhile father will play foxy when he comes home with a fine bun on, and he will carefully hide his mon ey so mother won't find it. And then he will get up with a big head and a dazed feeling and stall around for an hour trying to remember where he hid the blame money.

The first baby gets a silver mug, a gold ring, an ivory rattle and about \$200 worth of fine baby clothes. But the sixth baby is lucky if it gets two bibs and a ten cent box of corn

Dangers of a Cold. Do you know that of all the mino dangerous? It is not the colds them selves that you need to fear, but the serious disease that they so often lead For that reason every cold should gotten rid of with the least possi

ble delay. To accomplish this you will find Chamberlain's Cough Remedy of great help to you. It locsens a cold, relieves the lungs, sids expectoration and enables the system to throw off the cold. For sale by all dealers.—Adv.
